ExxonMobil

Recycling is right! Dispose your items safely and responsibly

Energy lives here™

In celebration of American Recycles Day, the ExxonMobil Houston Campus and Harris County Improvement District No. 18 will be holding a collection day of electronic equipment, batteries, bras (to recycle to carpet tiles), and papers for shredding. Members of the Springwoods Village community and employees are encouraged to bring their old electronics, batteries, and more for safe and responsible disposal.

Acceptable items:

- Computers, laptops, and accessories
- Routers, switches, and modems
- Telephones, cellphones, and video devices
- Printers, scanners, and ink cartridges
- CRT TVs and monitors up to 36", flat screens up to 50", cable boxes, DVD and VHS players
- Audio equipment

- Electronic components and metals
- Alkaline, NiCd and Lithium batteries (non-rechargeable batteries packed separately from chargeable ones)
- Bras (packed separately, they are recycled into carpet tiles)
- Paper for shredding

Personal papers and electronics will be collected by ExxonMobil's waste disposal partners, Pro Shred and CompuCycle, at the intersection of Holzwarth and Wellness Drive.

On the day of the collection, members of the community who want to drop off items should follow traffic directions and stay in the far left lane to avoid turning into the campus. Materials for collection should preferably be in the trunk, clearly separated from any other belongings so CompuCycle and Pro Shred can easily remove the materials while drivers remain in their vehicles.
