ExxonMobil

Recycling is right! Dispose your items safely and responsibly

Energy lives here™

In celebration of America Recycles Day, the ExxonMobil Houston Campus and Harris County Improvement District No. 18 will be holding a collection of electronics, paper for shredding, batteries, bras (to recycle into carpet tiles), thin plastic films, cork, eyeglasses, and bottle caps.

The collection is open to everyone in the Springwoods Village community. Take advantage of the opportunity to dispose of many items safely and responsibly.

Acceptable Items:

- Computers, laptops, and accessories
- Routers, switches, and modems
- Telephones, cellphones, and video devices
- Printers, scanners, and ink cartridges
- CRT televisions up to 36" monitors and flat screen televisions up to 50"
- Cable boxes, DVD, and VHS players
- Electronic components and audio equipment

- Thin film plastics (grocery and dry cleaning bags, air pillows, product wrap such as on cases of water, diapers, furniture, etc.)
- Alkaline, NiCd, and Lithium batteries
- Bras (to be recycled into carpet tiles)
- Paper (to be shredded on site)
- Cork (to be recycled into new products)
- Eyeglasses (will be donated for re-use)
- Bottle caps (to support the Santa Fe High School Bench Memorial Project)

Members of the community should follow traffic directions and stay in the far left lane to avoid turning into the ExxonMobil campus. Materials for collection should preferably be in the trunk and clearly separated from any other belongings so volunteers can easily remove them while drivers remain in their vehicles.
